PRODUCT HIGHLIGHT: MSR LUMBER

Over the past 10 years, Machine Stress Rated lumber has become a fast growing segment of the softwood lumber industry. This product segment will only increase its overall market share as the vast commercial and multi-family projects continue to drive the market. Single Family homes cannot be excluded from this growth, as they will also use more of this material as more exotic designs will require the use of MSR.

Sherwood Lumber is now stocking a full line of 2x4 1650, 2x6 1650, and 2x4 2100 at its Palmer, MA distribution center. Please contact your Sherwood Lumber representative for your MSR needs.
